Call for Paper

BBSBA2024 is an International Forum for new trends in Biological, Biomedical Sciences, and Biotechnology. The conference welcomes unpublished papers in different tracks in the fields of BioSciences and Biotechnology. New findings in biology and interdisciplinary science will be highlighted, along with emerging technologies in related fields. Novel therapeutic intervention strategies and challenges will also be featured. BBSBA2024, for the first time, gathers research specialists from different backgrounds for a discussion meeting. It will build a fruitful relationship between the authors for future collaboration.

All papers are reviewed using a blind review process: names and affiliations of authors are removed from the manuscript sent to the reviewers. Reviewers do not know each other's identities, nor do the authors receive information about who has reviewed their manuscript.
